

BRAIN TEASERS

You don't need to be a math whiz to solve these - all you need is some patience and, on occasion, a different way of looking at things. Brain teasers are meant to take more than a minute or two to solve. If you get stuck, remember the answers are right in front of you. The objective is to fill the grid so that each column, each row and each region contains the digits from 1 to 4 in the first sudoku, and 1 to 6 in the second sudoku and if you are up the real challenge 1-9 in the third puzzle.

Remember you can't use the same number twice in any row (side to side) column (up and down) or region (area in thicker black areas).
